617 2nd Ave, Apt. 2 // New York, NY // 10016

Projects

Fauxbook (Rails, React) | [live](#) | [github](#)

Full Stack Engineer // Single-page application based on Facebook.

- Optimizes load times by including meta-data from seven database tables into AJAX requests.
- Uses Pub/Sub with WebSockets to provide real-time notifications.

Pair Pressure (Rails, React, JavaScript) | [live](#) | [github](#)

Full Stack Engineer // Multi-Device Multi-Player Browser Game

- Uses AJAX short polling to provide a multiplayer experience for up to 15 players.
- Responsive design provides a simple and effective UX regardless of device.

A Series of Tubes (Ruby) | [github](#)

Developer // Lightweight MVC Framework written in Ruby

- Test Driven Design ensures a full coverage test-suite, and provides safety for implementing new features.
- Creates an ORM for storing and accessing data in a SQL database.

Skills

Ruby	Rails	JavaScript	Python (learning)	jQuery	React
SQL	Git	HTML5	CSS3	SASS	Flux

Education

Full Stack Web Development App Academy | New York | Winter 2016

- Focus on Rails, React, JavaScript, Pair Programming, SQL
- 1000-hours of coursework, 3% acceptance rate.

B.A. English University of Washington | Seattle | Winter 2005

- 3.1 GPA - Minor in Architecture

Experience

Business Development Manager Impression Printing | Seattle | 2013-2016

- Drove sales from 590k/Year in 2013 to 720k/Year in 2015.
- Launched database-driven dynamic printing as a service, and trained employees to program and execute jobs.
